Ottawa-Gatineau, Canada | 873 456-1675 | ctahe033@uottawa.ca | LinkedIn | GitHub | Portfolio

PROFILE

Software engineering student at the University of Ottawa (co-op program), seeking development internships. Versatile and self-taught: I learned React, Django, Android development and Next.js by building real projects, from the initial need to a deployed product. Comfortable in front-end and back-end development, UX/UI design and quality assurance. I document my technical choices clearly, in French and English, and use AI tools (Gemini, ChatGPT) in my workflow to learn and move faster.

EDUCATION

Bachelor of Software Engineering (co-op program) 2024 – present
University of Ottawa, Ottawa, ON — Expected graduation: January 2029

1st year, Networks and Telecommunications Systems (SRIT) 2023 – 2024
ESATIC, Abidjan, Côte d'Ivoire

Baccalaureate, Series C (science) 2022
Lycée Classique d'Abidjan, Côte d'Ivoire

PROJECTS

Portfolio (all my projects, live demos and code): mon-portfolio-six-xi-67.vercel.app

Salon G.Star Website — real client, Gatineau 2026
🔗 gstarsalon.vercel.app

- Bilingual (FR/EN) website designed, built and launched for a salon with no online presence: Next.js (App Router), React, TypeScript, Tailwind CSS, next-intl; static pages on Vercel
- Live “Open / Closed” sign based on the salon's time zone; local SEO (schema.org, hreflang, Open Graph); privacy by design (Quebec Law 25): blurred faces, GPS metadata stripped, no cookies
- Keystatic content management area in preparation, so the owner, who is non-technical, can edit hours, services and photos herself
- 21 unit tests (Vitest), 16 end-to-end tests (Playwright), GitHub Actions CI and Vercel continuous deployment; Google Business Profile created and validated

Sentinel — Remote Surveillance Camera System (personal project) 2026
🔗 sentinel-web-snowy.vercel.app/emitter

- Built for people without a security camera at hand: turns a device they already have (phone, computer) into a camera viewable remotely from a browser
- Designed and built solo a real-time system: React/TypeScript/Vite frontend, Django/DRF backend with Django Channels and WebSockets (ASGI), WebRTC video transport
- Set up STUN/TURN servers (Cloudflare, Metered) to keep connections working across varied networks (Wi-Fi, mobile data, international)
- PostgreSQL database; frontend deployed on Vercel and backend on Render, with continuous monitoring and fixes in real-world conditions

VoteBal — Online Voting Platform 2026

- Full web application (Next.js/React, Supabase/PostgreSQL) for a school prom vote, with relational integrity constraints and cascading deletes
- Manual testing of the full user journey and verification of uniqueness constraints to guarantee reliable vote results

UX/UI Portfolio — 5 deployed projects (SEG 3525 course) 2026
Personal portfolio, Docteur Cheveux, Memorizz, Palma, Black Friday dashboard
🔗 mon-portfolio-six-xi-67.vercel.app

- Personas, storyboards, Nielsen's heuristics, Gestalt principles, WCAG AA accessibility, colour theory and typography
- Bilingual (French/English) documentation of every design decision, written for teammates to read

uTaste — Android Restaurant Management App 2025

- Multi-role app in Java (Android Studio), SQLite database, OpenFoodFacts API integration
- Full UML modelling (use case, class, sequence), unit tests, team collaboration with Git branches

cpr.c — Process Management in C (Operating Systems) 2025

- Systems programming in C on Linux: process creation (fork, exec, wait), inter-process communication with pipes
- Debugged deadlocks and zombie/orphan processes by manual tracing with GCC

Quality Assurance Labs — JUnit Test Suites 2025 – 2026

- Designed test suites using equivalence class partitioning and boundary value analysis (BVA)
- Measured and improved branch coverage; identified and fixed flaky tests

SpeechFlow — Voice Assistance App (team project) 2026

- Researched and prototyped free hosting options (FastAPI, Whisper API) for an app built for a client with dysarthria
- Feasibility tests showed the limits of free hosting, leading the team to choose a paid API for a smooth experience (final version delivered by a teammate)

UoBuddy — Hackathon Project (uOttaHack 8) 2026

- Set up the repository structure and deployed the app on Vercel
- Collaborated with a team building a recommendation engine based on Solace PubSub+ and Gemini AI (component built by teammates)

TECHNICAL SKILLS

- Languages: Python, Java, C, TypeScript, JavaScript, SQL
- Frontend: React, Next.js, Vite
- Backend: Django, Django REST Framework, WebSockets/ASGI, Node.js
- Databases: PostgreSQL, SQLite, Supabase
- Mobile: Android development (Java, Android Studio)
- Quality: JUnit, equivalence class partitioning, boundary value analysis, branch coverage
- UX/UI: personas, prototyping, WCAG AA accessibility, Figma
- Tools: Git/GitHub, GitHub Actions, Vercel, Render, AI tools (Gemini, ChatGPT) integrated into my development workflow
- Not yet used: Docker, cloud platforms (AWS/Azure/GCP)
- Spoken languages: French (native), English (fluent), Spanish (basic)

PROFESSIONAL EXPERIENCE

Web Developer and IT Lead — Salon G.Star, Gatineau, QC October 2026 – present

- Built the salon's online presence from scratch: designed, developed and launched a bilingual (FR/EN), mobile-friendly, locally optimized website
- Made the salon visible on Google Maps and in search through the Google Business Profile I created and had validated
- Real-client engineering standards: 37 automated tests, continuous deployment and privacy compliance (Law 25) (see Projects)

General Assistant and Customer Reception — Salon G.Star, Gatineau, QC August 2026 – present

- Welcome clients and provide daily operational support in a fast-paced setting, in direct contact with customers
- Manage priorities and multiple tasks in a customer-service context

Renovation — JB's Services, Gatineau, QC September 2026 – present

- Floor installation and painting on residential renovation sites
- Quickly learned the materials and resources required; actively supported renovation work

Busboy — Ambiances d'Angkor, Joliette, QC June – August 2025

- Customer service and teamwork under pressure in a fast-paced operational environment
- Coordinated with floor and kitchen staff to keep service running smoothly

VOLUNTEERING AND INVOLVEMENT

Protocol — "Le réveil des héros" Conference (Réveillez les héros 2026) 2026

- Responsible for the smooth running of the event, including setup of the music and sound equipment
- Coordinated vendors and speakers on site to keep the programme flowing

Chantre Committee (choir) — Meta Intimacy NGO, Gatineau 2025 – present

- Team musical performances at community events
- Consistent discipline and commitment in a collective, volunteer setting

Member — Computer Club and CCEE, ESATIC 2023 – 2024

Abidjan, Côte d'Ivoire

- Built HTML/CSS projects as a team in a student setting
- Designed visual material (posters, handouts) for student community events
